## Fixes

### Accessibility

Various accessibility improvements and fixes have been made to the Navigate360 staff platform.

### Various Fixes

- Fixed an issue where automation searches were incorrectly returning all students instead of those targeted by the search/report.
- Users were able to view the Events section of the Campaigns & Events page even after all permissions were removed, without being able to view an Event or take actions related to them.
- Fixed an issue where duplicate appointment summaries were displaying in the Student Profile History tab.
- Report Finder recommends one report where possible, instead of joining two reports. It will still recommend two reports if the scenario requires it.
- Small fixes to the AI Report Finder.
